WELCOME YOUR JOURNEY STARTS HERE

Studying in Australia

For a country with a relatively small population, Australia offers a truly world-class education and regularly features in global rankings. Australia is currently the third most popular destination for international students in the English-speaking world, behind the United States and the UK. Many international students choose to study here because of the cultural diversity, friendly natives, and high quality of education.

“Graduates from Australian Registered Training Organisations (RTOs) are highly sought after due to the impressive international reputation of the Australian education system.”

Diverse & Welcoming

Australia is known globally as one of the world's most diverse and welcoming countries.

Of Australia's 24 million population, almost half (47%) of all Australians were either born overseas or have one parent born overseas, with more than 260 languages spoken in Australian homes. In addition to English, the most common are Mandarin, Italian, Arabic, Cantonese and Greek.

Plenty to see and do

When you think about Australia, you probably imagine beautiful white sand beaches or famous landmarks like Sydney's Opera House. What you may not know is that Australia is a wonderfully diverse country, home to just about every type of landscape — from lush rainforests to vast dry deserts. Australia also hosts a number of World Heritage sites, such as Queensland's Great Barrier Reef and Uluru-Kata Tjuta National Park.

Work Opportunities

International students can work up to 40 hours per fortnight in Australia, which will help you pay for things like nights out with friends or short trips over holiday breaks. Students also have the opportunity to stay in Australia to work once they have graduated, taking advantage of the post-study work visa.

WHY CHOOSE AICBT

Australia's favourite provider of Business & Technology accredited courses.

Originally founded in 1995, AICBT has had the same vision since day one: to bring our students quality tuition that guarantee them the best possible outcomes and positioning in the workforce.

We strive to provide career development opportunities for a range of individuals, including those who may already have developed some practical experience and who wish to further develop their higher-level skills or others with more limited knowledge of the subject seeking the knowledge and skills to progress within their career.

Experience

With more than 12,354 enrolments registered since 1995, we continue to offer access to a wide range of academic opportunities.

Trainers

Each of our trainers is an industry professional with formal academic qualifications backed by 'hands on' industry experience.

Alumni

Our students typically outrank their competition and are considered first for positions of interest.

Australia's favourite RTO since 1995

Supporting students to become experts in their field with the flexibility to adapt to diverse cultures has been our priority since AICBT was first incepted in 1995.

Learn more:

BSB50120 | Diploma of Business

Target students of this qualification reflect the role of individuals in a variety of Business Services job roles. These individuals may have frontline management accountabilities.

Target students will carry out moderately complex tasks in a specialist field of expertise that requires business operations skills. They may possess substantial experience in a range of settings but seek to further develop their skills across a wide range of business functions.

Learn more:

BSB50420 | Diploma of Leadership and Management

Target students of this qualification reflect the role of individuals who apply knowledge, practical skills and experience in leadership and management across a range of enterprise and industry contexts.

Target students will display initiative and judgement in planning, organising, implementing and monitoring their own workload and the workload of others. They use communication skills to support individuals and teams to meet organisational or enterprise requirements. Target students may plan, design, apply and evaluate solutions to unpredictable problems, and identify, analyse and synthesise information from a variety of sources
